**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 15-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Thorn (2,556,890).

Thorn discloses a blade ring (Figs. 1-4) for a turbine engine comprising a hollow substantially cylindrical body 4 having an inner peripheral surface and an outer peripheral surface; a plurality of airfoils 5 attached to the inner peripheral surface of the body; a plurality of notches (for inserting keys 36 and 17) in the outer peripheral surface of the body; at least one pair of attachments 19 (Fig. 3) on the outer peripheral surface;

wherein the at least one pair of attachments are posts;

wherein one attachment of the at least one pair of attachments is disposed substantially peripherally opposite to the other attachment of the at least one pair of attachments (Fig. 3); and

wherein the plurality of notches are disposed substantially equidistantly about the outer periphery of the blade ring (Fig. 1).

***Allowable Subject Matter***

3. Claims 1-14, and 20, due to the method steps of providing a plurality of roller pins, inserting the roller pins, and disengaging the pins, are allowed.

4. Claim 19 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Prior Art***

The prior art made of record but not relied upon is considered pertinent to applicant's disclosure and consists of 2 patents.

Mazzola et al. (6,174,129) and Grosjean et al. (4,292,008) are cited to show different nozzle ring constructions.
